

make a cement truck

1. Cut sections A, B, C, X and Y from MDF or birch plywood using the patterns on the following pages.

2. Make D from sections of a square wood dowel, 3/4 inch diameter. (Or cut from 3/4 inch MDF if a square dowel is not available)

3. E, F, and G are inexpensive wood shapes. Please refer to website instructions to find out where to buy.

E - is a wood button shape (3/4 inch diameter)

F - is a wood toy wheel (2 1/2 inch diameter)

G - is a wood circle shape (1 inch diameter)

4. Z is a square wood dowel (3/4 inch diameter) cut to 14 inches in length
