

make a jet plane

1. Connect the X and Y pattern pieces together to make a cloud shape. You will need an upper cloud and a lower cloud. Cut the clouds from 1/4 inch thick MDF.

2. Cut sections A, B, C, and D from MDF or wood using the patterns on the following pages, noting the thickness needed for each shape.

2. Circle shape E is a wood circle. (1 inch diameter) You will need three of these to use for windows. Refer to website for where to purchase these circles.

A

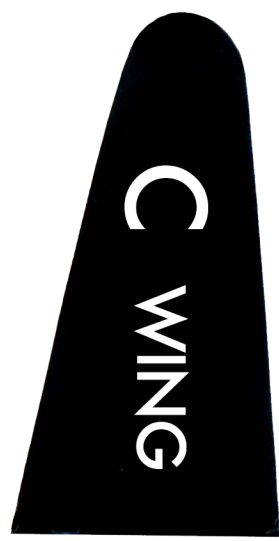

PLANE BODY

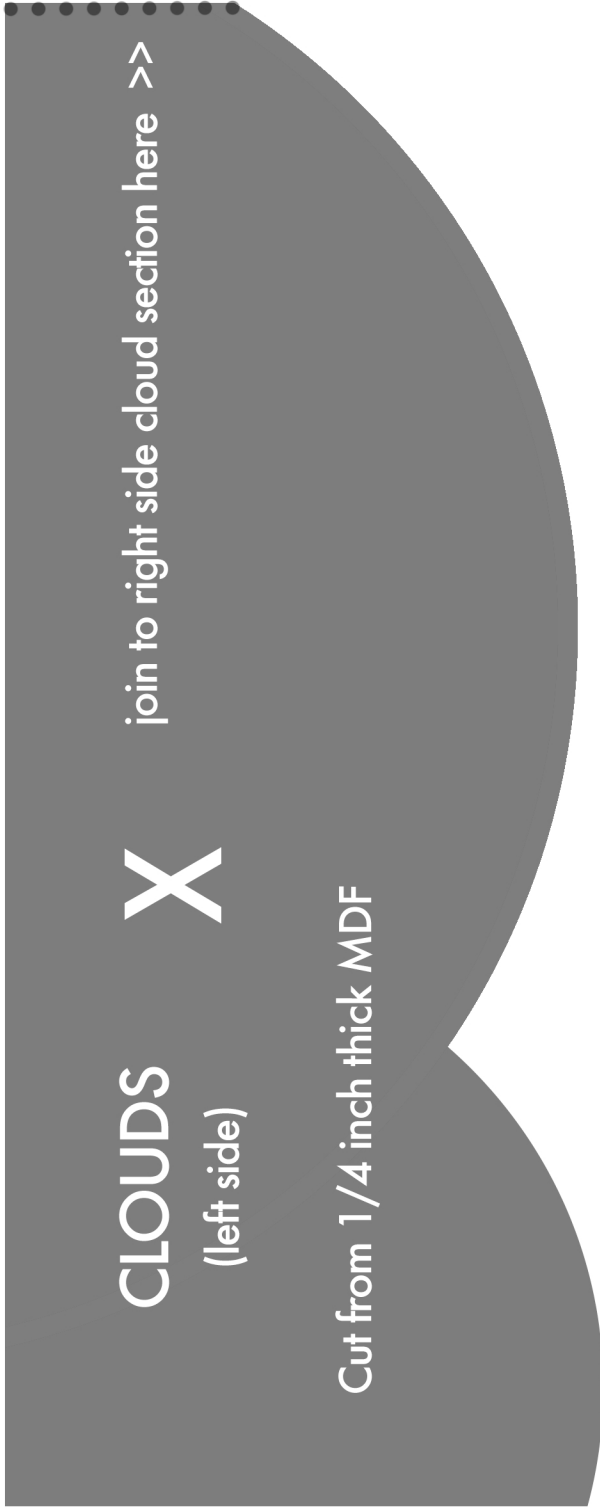

Cut 1 from $\frac{3}{4}$ inch thick MDF or wood

Cut each of these parts from 1/4 inch thick MDF or wood

STABILIZER

**Join left and right cloud sections together
to make one pattern piece before cutting**
