

make a wood bus

1. Cut sections A, B, E, X and Y from MDF or wood using the patterns on the following pages, noting the wood thickness needed for each piece before cutting. Combine A and B pattern pieces together before cutting.

2. C, D, F, and G are inexpensive pre-cut wood shapes. Please refer to website instructions to find out where to buy.

C - is a wood button shape (3/4 inch diameter)

D - is a small wood dowel cap (1/2 inch diameter)

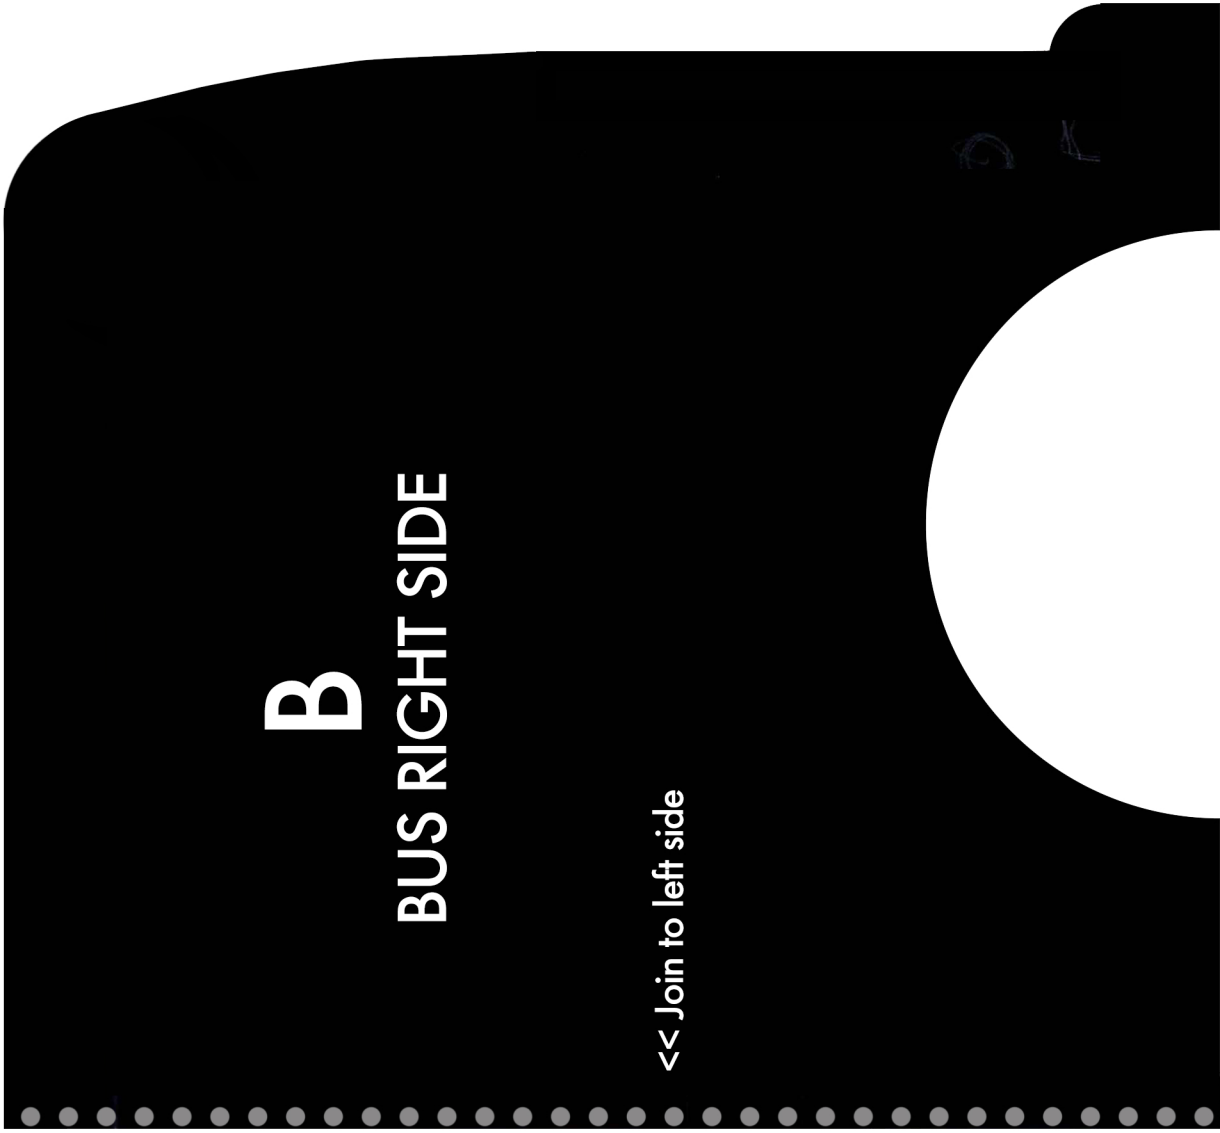

F - is a wood toy wheel (2 1/2 inch diameter)

G - is a wood circle shape (1 inch diameter)

3. Z is a square wood dowel (3/4 inch diameter) cut to a length of 14 inches

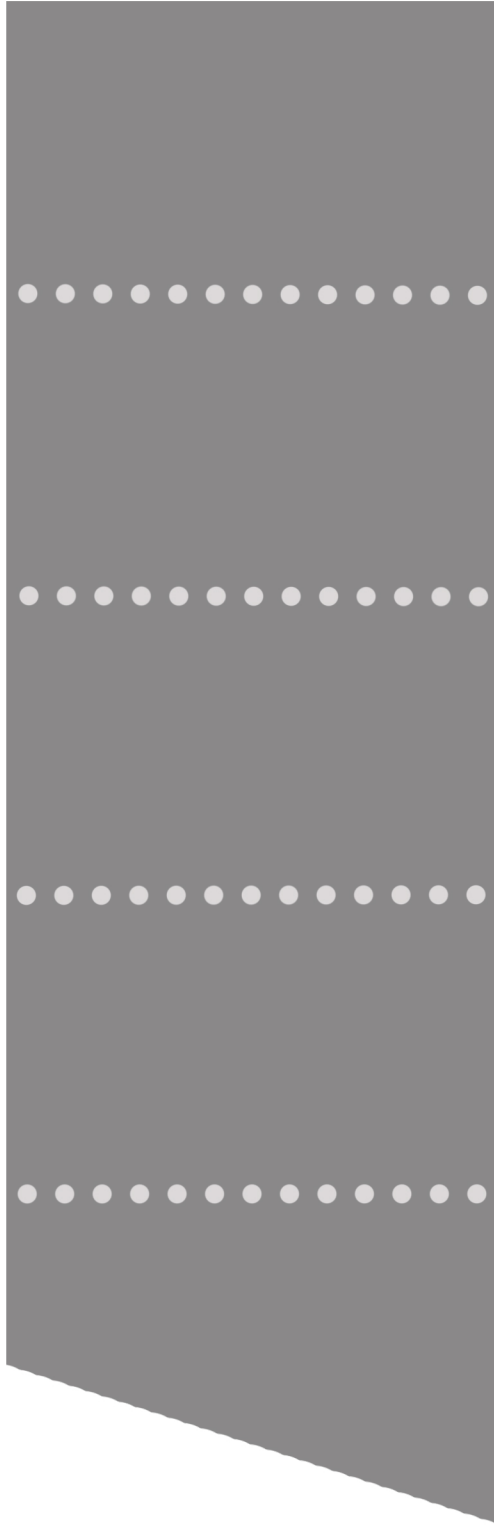

B

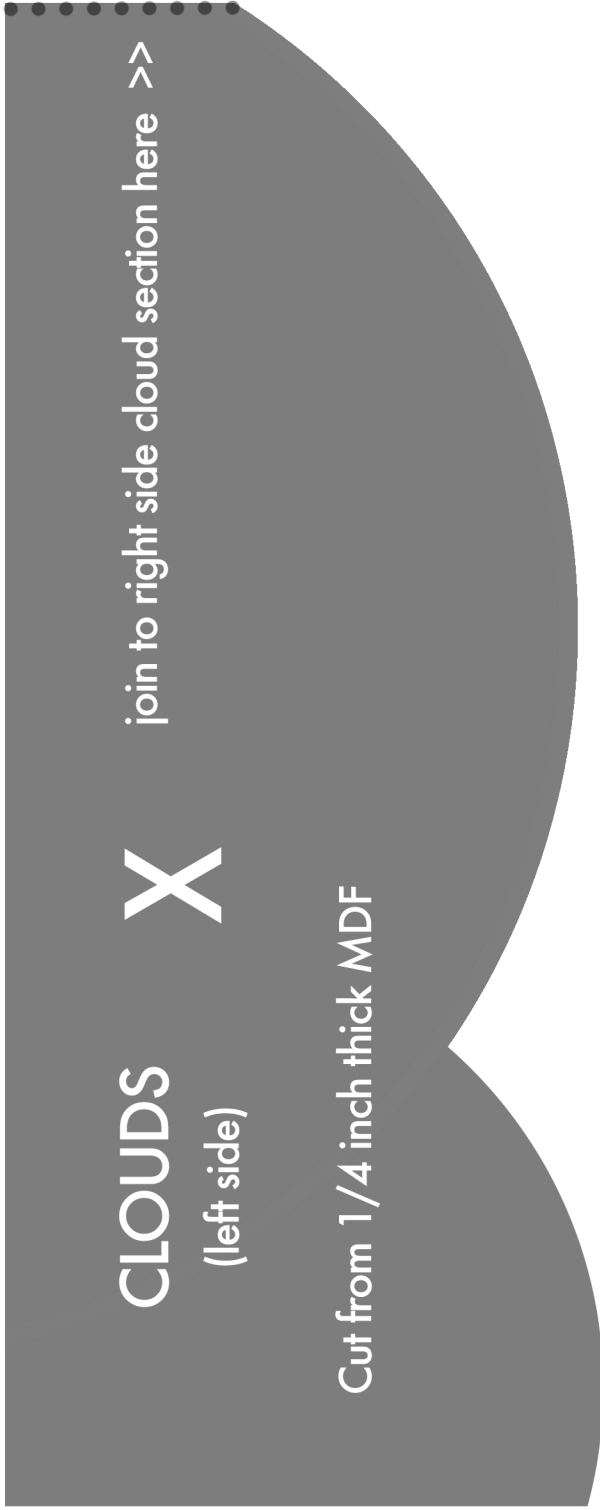

BUS RIGHT SIDE

<< Join to left side

E WINDOWS

Cut windows from 1/4 thick MDF. For ease of cutting, start with an 8 inch rectangle, and then cut apart on dotted lines as shown.

**Join left and right cloud sections together
to make one pattern piece before cutting**
