

make a helicopter

1. Connect the X and Y pattern pieces on the following pages to make a cloud shape. Cut the clouds from 1/4 inch thick MDF.

2. Cut sections A, B, C, D, and E from MDF or wood using the patterns on the following pages, noting the thickness needed for each shape.

3. The following pieces are inexpensive pre-made wood shapes. Refer to the website to find out where to purchase:

F is a small round wood ball.

The two G pieces and J are sections of a round wood dowel

H is a square wood dowel cut to a length of 5 inches.

Use a small wood dowel cap to make the center of piece E.

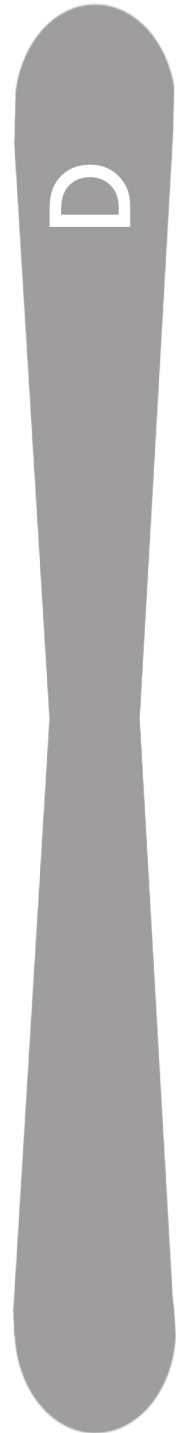

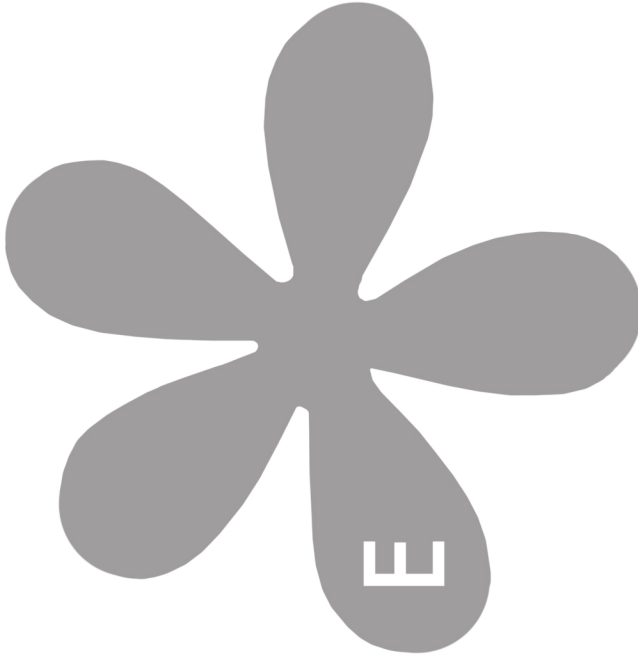

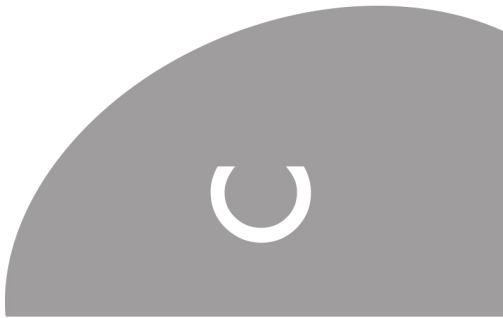

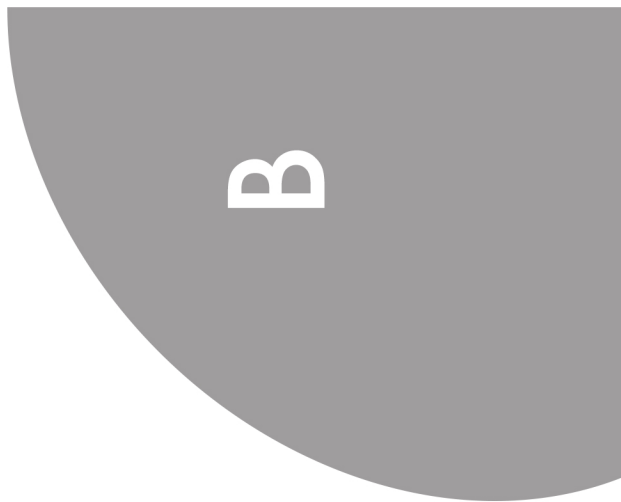

A

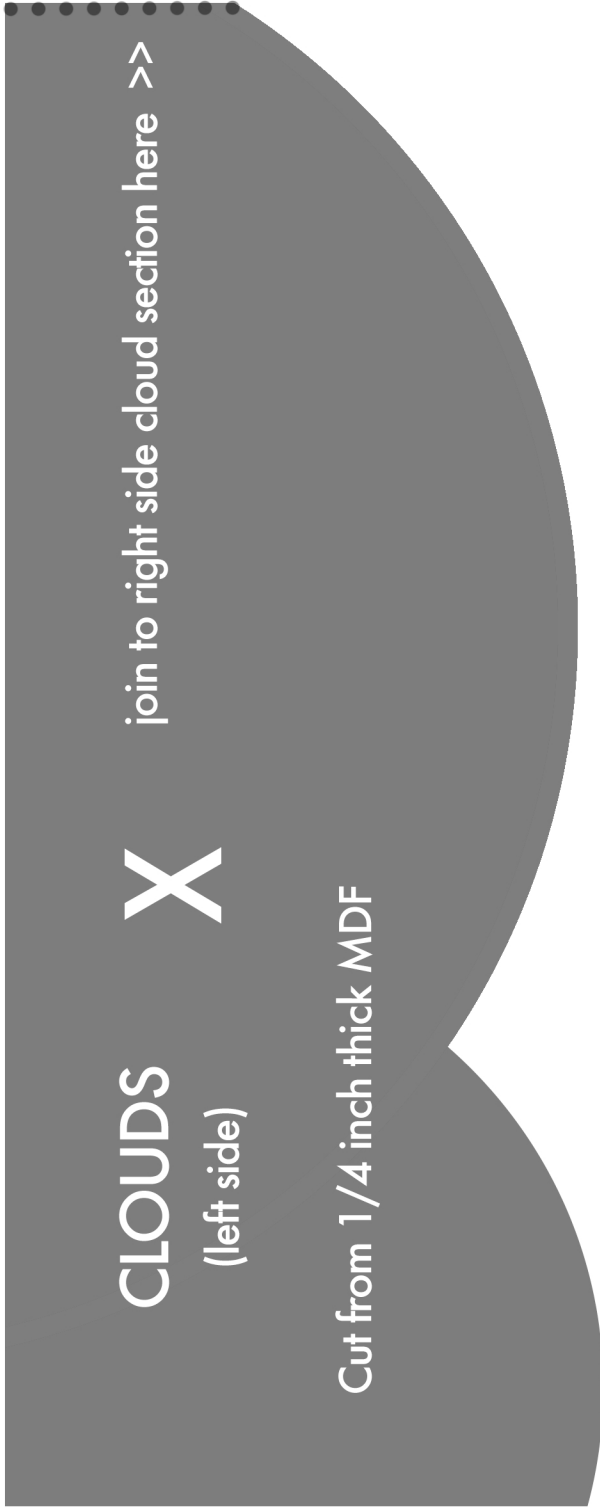

HELICOPTER

Cut helicopter from 3/4 inch thick MDF or wood

Cut each of these shapes from 1/4 inch MDF or wood

**Join left and right cloud sections together
to make one pattern piece before cutting**
